.html How to run them? (the downloaded files are in same directory) A: Well this is not what.net is about. If you mean what you want to do by making a.NET "console" program with a.exe extension then this is possible. What you actually want to do is convert a DLL to an EXE. And that is pretty easy. Note however that if you use code compiled into an EXE then you lose the ability to use the DLL that you are calling. In the wake of Hillary Clinton's loss in the 2016 presidential election, the former secretary of state has become a controversial figure for her use of a private email server during her time as a U.S. government official. And it seems she won't soon be able to live that part of her life in peace. A little over a week ago, a man in Minneapolis who was upset about her handling of the 2012 attack in Benghazi, Libya, allegedly filed a lawsuit that accuses her of being a "citizen of the planet". The suit claims that the letter, apparently filed with the US Federal Court in Oregon, accuses Clinton of

“the intentional and malicious ‘citizen of the planet’ conduct in the form of her acts of treason and infanticide by deliberate and willful participation in the above-described ‘Mafia-like’ child trafficking and murder of the children and infants”. It goes on to say that she and her campaign “enjoyed wide and broad fame and became celebrities, both in the U.S. and throughout the world”. The suit also claims that Clinton “knew or should have known that her acts were prohibited by law and that her actions and instructions to others to commit such prohibited acts were intentional and malicious”. If you’re wondering how such a suit made it to the Federal Court, it looks like the man has been provided with the wrong court. Seems it’s against a court in Oregon and not the federal court in Washington DC, as the lawsuit claims. According to court records, the man, who appears to be a Trump supporter, is named 82157476af
